1995 – 2000 HLW Weiz with a focus on environmental economics
Foreign languages: English and basic knowledge of French

QUALITIES

Holistic thinker, process-oriented, structured, solution- & future-focused, team player

KEY COMPETENCES

Combining deep technical and commercial expertise, developed through many years of experience in international plant engineering companies.

- Development of technical plant concepts, including preparation of functional specifications to ensure optimal process flow.
- Establishment of commercial processes to support both technical and financial project execution, including ERP system implementation/adaptation to secure an optimized value chain.
- Management of R&D projects as interface between technical departments and public/private funding bodies at national and EU level.

VISION & PASSION

The greatest strength of any company lies in the combination of technical expertise for its products and a solid understanding of value-adding business processes. Both areas are key to long-term success.

Thanks to my career path in both fields, I see my strength in developing solutions that optimize value creation from both a technical and commercial perspective.
It inspires me to see change processes—driven by both leadership and employees—translated into measurable business success.

HOBBIES

Spending quality time with my family

*The smallest details can unlock
the greatest success!*
